Professional Summary

Full-Stack Developer with proven experience delivering scalable, production-grade web applications for international clients. Specialized in architecting end-to-end solutions across React.js, Next.js, Node.js, Express.js, and MongoDB, with strong command of RESTful API design, secure authentication, role-based access control (RBAC), and real-time systems. Track record of building multi-tenant SaaS platforms, optimizing application performance, and shipping features from concept to deployment within agile, remote engineering teams.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3, SCSS
Frontend	React.js, Next.js, Redux Toolkit, Tailwind CSS, Material UI, SCSS/Sass, Responsive Web Design
Backend	Node.js, Express.js, RESTful APIs, GraphQL, Socket.io, WebSockets, JWT, OAuth, 2FA/TOTP, RBAC, NextAuth, Twilio, System Design
Databases	MongoDB, PostgreSQL, MySQL, Sequelize ORM, Redis, Supabase
DevOps & Cloud	Linux, Git, GitHub, CI/CD, Docker, AWS, Cloudinary, Vercel, Netlify, Multer
AI/ML	Hugging Face, OCR Integration, LLM Integration, Prompt Engineering
Practices	SaaS Architecture, Microservices, Agile/Scrum, Test-Driven Development, Performance Optimization, Problem-Solving

Experience

Full-Stack Developer (Remote) – UK

June 2025 – Present

thislinks.online

- Built the complete admin panel for a multi-tenant SaaS platform, including secure login hardened with Google Authenticator-based two-factor authentication (TOTP) requiring a time-based code on every sign-in.
- Developed vendor and staff portals featuring home pages, dashboards, and a real-time chat application, enabling internal team communication and reducing reliance on third-party messaging tools like WhatsApp.
- Implemented granular role-based access control (RBAC) where vendors assign permissions to staff, ensuring staff access only the specific resources and library sections granted to them.
- Engineered responsive, component-driven interfaces using React.js, TypeScript, SCSS, and Redux Toolkit, delivering a consistent experience across admin, vendor, and staff portals.
- Designed and developed RESTful APIs with Node.js and Express.js, using Sequelize ORM for relational data modeling and Redis caching to cut response times.
- Integrated Twilio for automated SMS communication workflows and Socket.io for real-time, bidirectional chat and live updates across distributed users.
- Architected relational database schemas and optimized complex SQL queries, streamlining staff management, scheduling, and workforce coordination.

Projects

DiagnoXpert – AI Healthcare Platform

Live Demo

- Developed a healthcare web platform with **Next.js** featuring separate doctor and patient dashboards.
- Implemented secure **authentication** and **role-based access control (RBAC)** for multiple user types.
- Integrated **Tesseract.js OCR** to extract structured medical data from reports and uploaded images.

- Built an AI-powered pipeline using **Llama3-OpenBioLLM** to generate personalized diet plans and medical guidance.
- Enabled free-text health queries with **AI-generated, context-aware responses**.
- Developed a **real-time doctor-patient chat system** and appointment booking functionality.

Easy Finder Platform

Live Demo

- Built a full-stack product comparison platform with **Next.js** and **Supabase**.
- Enabled cross-website comparison of laptops, phones, and tablets with country- and price-based filtering.
- Engineered scalable **search and filtering systems** for improved product discovery.
- Delivered responsive UI components and optimized database queries for faster performance.

Portfolio Management Platform

Live Demo

- Built a responsive, full-stack portfolio platform with **React.js, Node.js, Express.js, and MongoDB** for showcasing projects and professional profiles.
- Engineered a modern, performance-optimized UI with seamless navigation and dynamic content management.
- Implemented a scalable full-stack architecture with clean API integration and reusable components.

Real-Time Chat Application

- Developed a full-stack real-time messaging application using **React.js, Node.js, Express.js, and Socket.io**.
- Implemented **JWT authentication** and protected routes for secure access and robust session management.
- Designed a fully responsive interface with **Tailwind CSS** optimized for mobile and desktop.
- Integrated **real-time communication** for instant messaging and live updates.

Certifications

- Introduction to MySQL – DataCamp
- Introduction to Artificial Intelligence – DataCamp

Leadership & Activities

- Led a team of 4 developers as Final Year Project Team Lead, owning frontend, backend, AI integration, OCR systems, deployment, and task coordination.
- Competed in university-level coding competitions, strengthening problem-solving and algorithmic skills.

Education

Bachelor of Science in Computer Science

COMSATS University Islamabad (CUI), Sahiwal Campus

CGPA: 3.3 / 4.0
